**8-22-11**

**To Whom It May Concern:**

**We purchased a surveillance system from CCTV Services about a year ago and could not be happier. The investment has more than paid for itself many times over. The system has become and invaluable tool to our everyday activities and cannot imagine doing business without it. With capabilities to view our premises from virtually anywhere the system has given us the flexibility and piece of mind we were looking for.**

**Along with a great product to offer the staff at CCTV are professional, cordial and extremely knowledgeable. I would recommend CCTV and its products to anyone who may be considering a security system of any kind.**
